Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Response to Amendment

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 14-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 14 recites the phrase "in which the or each of the hole is" in line 1, Claim 17 recites the phrase "in which the or each hole" in line 2, these phrase render the claims indefinite.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-5, 7 and 10-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Eke(U.S.Pat.6,452,142) in view of Fuls et al.(U.S.Pat.6,462,320). Eke discloses a microwave oven and subassemblies that show many of the feature of the claimed invention but does not explicitly show three magnetrons with associated

waveguides. Fuls discloses a dielectric heating device employing microwave heating devices that explicitly shows three magnetrons with associated waveguides. It would have been obvious to one of ordinary skill in the art at the time of the claimed invention to use three magnetrons as taught by Fuls with the device of Eke because the number and position of the localized maxima can vary with the output frequency of each magnetron.

Allowable Subject Matter

Claims 6, 8 and 9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Eke'077, Bible, Kim, Kuroyanagi and Kim'575 are cited to show structure and method similar to the claimed invention.
